INSPIRE AND DEEPEN YOUR YOGA PRACTICE by studying anatomy with Julie Gudmestad. During this series will focus on one area at a time, starting by seeing and feeling bones, joints, and muscles. Then we will bring anatomy to life by practicing poses that strengthen and stretch the highlighted muscles. The asana practice will build from easy to more challenging poses. Everyone will be encouraged to work at their own pace, with ample time for questions. Anatomy can be fun!

We will:

- Use lecture, demonstration and asana practice to support your learning.
- Use and practice anatomical language, to help deepen your understanding of human movement patterns.
- Study how muscle imbalances can contribute to pain and disrupt the injury healing process.
- Suggest poses and sequences to help make progress with challenging poses.

REGISTRATION: Call or email now to reserve your spot in this weekend workshop; limited spaces are available. This workshop is open to Gudmestad Yoga students Level 3 and up and will also provide a rich learning opportunity for yoga teachers & teacher trainees.

This will be an active workshop and therefore is not appropriate for students with acute injuries or significantly limited mobility.

This class is worth 10 CE credits through the Yoga Alliance.
